I am including some homework and assignments my students submitted for my *Introduction To Game Art* class.

This class was made up of **first year students** and this was their first "official" introduction to digital art creation.

Contents

— Introduction to Game Art.

Robot Assignment _____ 5
Still Life _____ 8
Pattern, Repetition & Proportion 12
Balance, Emphasis & Movement 14
Color Harmony _____ 15

My goal as an educator.

To inspire curiosity, foster critical thinking, and empower learners to grow through inclusive, innovative, and meaningful educational experiences.

Robot Assignment

Intro to game art

Using Adobe Illustrator as an introduction to working with vectors, my students first created a series of thumbnail ideas, before moving on to create a set of turnarounds with one developed character.

This introductory class begins with vector assignments in grayscale.

Still Life Assignment

Intro to game art

After a series of lessons and homework assignments about the principles of design and composition, we move on to grayscale digital painting in Adobe Photoshop.

My students work with digital photography to explore lighting and composition of reference images to paint.

They then create a digital painting from their reference images. Reference images needed to be on a separate screen, and we worked on these in class, to minimize paintovers.
